

LX-Moby

November 03

Mobility package for LX series

LX-Moby combines LX, Remote control unit, and Battery system. You can use LX series as stand-alone data recorder.

Benefit

- ✓ All in One package (LX + Remote Control Unit + Rechargeable Battery system)
- ✓ Operating method is quite similar to stand-alone data recorder.
- ✓ Using built-in battery, over 3 hours operation is possible.

LX-Moby provides stand-alone recording

LX series can be used like the conventional data recorder.

LX-RC2 Remote control unit

LX-Moby includes LX-RC2 colour TFT type remote control unit. LX-RC2 can control all function of LX series. The control menu is intuitive and easy to use.

Rechargeable battery system

LX-Moby includes 130wh high-power rechargeable battery system. You can use LX system over 3 hours* on filed measurement. The battery system includes charging circuit. There are button and LEDs on the Top of battery. It is also possible to know the remain power, if you push the button.

* Not using expansion unit.

LX series usage

As a Data Recorder
